THAN A GOOD
PRICE**

HEALTH, SAFETY & LEGAL COMPLIANCE

RPE (Respiratory Protective Equipment) is used by hundreds-of-thousands of front-line healthcare staff across the UK every day.

Used as the last line of defence against respiratory hazards, such as multi-drug resistant TB and influenza, it's essential that the RPE your staff use is adequate for the hazard and suitable for the person to prevent cross-contamination, ill-health or even death.

That's why in the UK it is a legal requirement that staff required to wear a tight-fitting respirator pass a Face Fit Test before wearing RPE in the workplace. Furthermore, Fit Test reports and maintenance records must be properly kept for up to 40 years.

A recent study found that as many as 69% of respirator wearers aren't protected by their RPE; due to lack of training, misinformation and unsuitable respirator choice.

At Full Support Healthcare we are challenging the status quo of delivering Respiratory Protection services to the UK healthcare industry.

Respiratory protection isn't simply about having the right equipment.

With an equal focus on education, training, consultation and product, when partnering with Full Support Healthcare you can rest assured that we will journey with you and your staff in becoming confident, competent and compliant in your use of RPE.

**Whatever your situation,
we're here to help.**

**COMPETENT
CONFIDENT
COMPLIANT**

**It's not just our motto
it's our guarantee.**

OUR VISION, MISSION AND VALUES

OUR VISION

Is for a world where those who care for others aren't taken ill themselves through airborne cross-contamination and exposure to respiratory hazards. A world where people don't have to worry about getting sick from doing their job.

OUR MISSION

Is to continue being the UK's market leading provider of RPE to the healthcare sector. To raise awareness of respiratory hazards and raise the bar of RPE training. To see all staff competent, confident and compliant in respiratory protection.

OUR VALUES

Integration – with decades of experience working with, for and in the healthcare sector we know the intricacies and difficulties of protocols, policies and procedures. We pride ourselves in integrating our services in easily accessible means, to ensure ease of access and use for our customers.

Education – we have seen first-hand how respirators and other protective equipment can easily be misused (or not used) with inaccurate or inadequate education and training. As a result, we prioritise education, consultancy and ongoing training with all our partnerships.

Innovation – technology doesn't stand still, and neither do we. With the likes of our RPE Kits, Cascade Bags and Vigilant Safety Solutions we don't see problems, just opportunities.

EDUCATION & TRAINING

Without specialist training, Fit Testing and education, RPE simply won't offer the level of protection your workforce needs to stay healthy.

That's why we've developed a bespoke model of customer support that provides CPD accredited training courses, webinars and e-news to all of our RPE partners.

For more information,
please visit our Education
and Training website:

PRODUCTS & SERVICES

When it comes to RPE there is no one-size fits-all solution.

But with Full Support, we offer a range of different products to meet your every need.

Offering FFP3 disposable respirators, half-masks, full-face masks, Powered Air, Qualitative Fit Testing Kits, Quantitative PortaCount® machines and more; whatever your situation we're got you covered.

SOLUTIONS & INNOVATIONS

If you're unsure what you need, we can help there too. With our fully comprehensive RPE auditing and consultancy services, we can help you to create, maintain or update your Respiratory Protection Plan to ensure your workforce are safe and your company regulatory compliant.

THE FUTURE OF RPE COMPLIANCE

Full Support is proud to introduce the first completely paper-less RPE recording software for RPE Fit Testing and monitoring.

This new and innovative system empowers organisations to accurately monitor and record their use of RPE across multiple site – ensuring fully auditable legal compliance.

This table highlights some of the key differences between respirator types:

Data Management Centre

- Flexible configuration for your organisation
- GDPR ready
- Cloud-based digital record keeping

Reporting Suite

- HSE compliant reporting
- Infographic displays
- Detailed analytics

Field Application

- Fit Test assistance guides
- Signature & photo ID recognition
- Book and manage training courses and Fit Test days

OUR SERVICE MODEL

We work hard on providing you the easiest and most straightforward fulfilment options, so you don't have to.

Offering our services through NHS Supply Chain, Shared Business Services, online, phone ordering and direct sales – whatever your preferred method of business to business ordering, we can help.

Here at Full Support, we know that availability isn't everything.

CENTRAL CONTACT CENTRE

Our English-based contact centre are there to support you. Whether it's a quick email enquiry or an urgent technical call, they're here to help..

REGIONAL EXPERTISE

Our team of Fit2Fit Accredited regional RPE Experts have over 50 years' experience in Health & Safety, Education and RPE.

BESPOKE SOLUTIONS

We appreciate that every organisation has different needs when it comes to RPE.
